If delivery pressure is different than 7" w.c. (4 oz), please indicate:

Total Gas Load: BTU (or square footage if residential):

OFFICE USE

Customer Number:

Premise Number:

Requirements: Gas main must be installed and available to serve this property, lot is at final grade and work area has been cleared. Also, the house line must be plumbed-out on the side designated for gas service (refer to gas main installation design/map) as well as no further than 3 feet back from the front corner of the building foundation.

KGS intends to provide a residential gas service line within 10 working days. The first 60 feet of the service line (1-1/4" diameter or less) is free. Any additional footage will be billed at $3.50 per foot. All extraordinary construction costs such as rock removal or padding dirt installation will be billed after installation.

*If indicated above that the individual requesting a service line is also the same individual requesting a meter set/turn on, a turn on order will be generated after the service line has been installed and city inspection of the houseline, if required, has been complete.

For all other inquiries, contact our Information Center at 1-800-794-4780
Or visit our Web site www.kansasgasservice.com.

** Disclaimer: It is the intention of KGS to provide service as explained in the policy, unless circumstances arise beyond the Company's control, such as storm emergencies, outages, inclement weather and natural or man-made disasters.
