

# Natural Gas Matters

IDEAS AND INSIGHTS FROM YOUR NATURAL GAS SERVICE PROVIDER

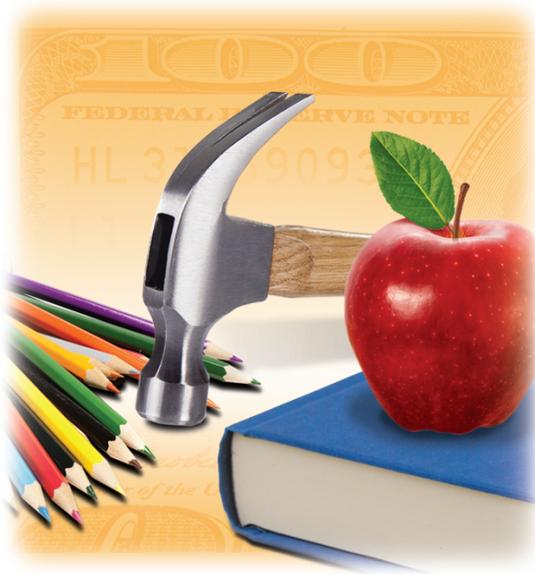

**KANSAS  
GAS SERVICE**

A DIVISION OF ONEOK

## Energizing Our Communities

**A**s the state's largest natural gas distribution company, Kansas Gas Service provides safe, reliable natural gas to more than 630,000 customers in Kansas. But providing energy to homes and businesses isn't all we do – we also support programs and organizations that improve the quality of life and economic well-being in the communities we serve. And our investments in these programs reach as far as our pipelines.

Kansas Gas Service is a division of ONEOK, Inc. and, together with the ONEOK Foundation, invests in helping and improving our communities. In 2012, Kansas Gas Service, other ONEOK business divisions and the ONEOK Foundation contributed \$5.3 million to charitable causes in ONEOK's service areas.

In addition, our employees generously supported the United Way, and ONEOK matched their pledges dollar for dollar, to contribute more than \$478,000 to help maintain the good work of United Way member agencies in Kansas. And our commitment extends to more than just financial assistance. Our employees volunteered their time, devoting more than 2,300 hours of hands-on work to a variety of worthwhile community projects.

We are proud to be part of a company that is committed to giving back to our communities, and we are happy that, through this commitment, we can help make a meaningful impact in the lives of others.

To learn more about ONEOK's commitment to corporate responsibility, go to [www.oneok.com](http://www.oneok.com). ONEOK's Corporate Responsibility Report is at the bottom of the page beneath the "Reports & Filings" heading.

# Compressed Natural Gas – Clean, Green and Economical

*Did you know that the same fuel you use to heat your home can be used to power your car?  
Compressed natural gas (CNG) is an environmentally friendly transportation fuel that is used by more than 120,000 people in the United States.*

As the cleanest burning fossil fuel in use today, CNG costs, on average, about half the price of gasoline. Clean-burning CNG has always been a great choice for the environment, and at such a low cost, it's a smart choice for your budget, too.

Find out more about CNG at [www.kansasgasservice.com](http://www.kansasgasservice.com).

## Conservation Corner

*Introducing Our New Online Energy Calculators*

*Are you curious about the difference between natural gas and electric appliances?  
Wondering how to save money with a programmable thermostat? Find out the answers to these common energy questions and more with our new online energy calculators.*

Designed to help customers find the most energy-efficient solutions for their homes, these easy-to-use calculators compare thermostat, appliance, home-heating and water-heating options specific to your home and family.

### Here's how to use it:

- Visit [www.kansasgasservice.com](http://www.kansasgasservice.com) and click on "Energy Calculators for Your Home" under the "Save Energy & Money" tab.
- Select the calculator you are interested in, and follow the prompts provided.
- Once you have entered the information, the calculator will provide you with an answer to the question you selected.
