

Natural Gas Matters

IDEAS AND INSIGHTS FROM YOUR NATURAL GAS SERVICE PROVIDER

It's National Safe Digging Month DO YOU KNOW WHO TO CALL?

Spring is here, and you may be eager to start those outdoor projects you've been putting off all winter. But before you grab your shovel, there's an important call you need to make: **811**. It's a free call that can keep you and your neighborhood safe.

There is a vast network of pipelines, telecommunication cables and electrical wires buried underground, and if you accidentally hit one of them when digging, you could interrupt services that thousands of people depend on – and put yourself in danger as well.

Accidental damage to underground facilities can be prevented. One phone call to **811** from wherever you are will route your call to Kansas One Call, which will alert owners of pipelines, telecommunication cables and power lines to mark their buried assets within two business days of the request. There's no charge to you for this service.

Whether you're planting a tree, tilling soil, installing a deck or sprinkler system or setting fence posts, always remember to call **811** at least two full business days before you plan to dig to allow all utility line locations to be marked.

It's easy to do. So during National Safe Digging Month, and any time of year, be safe – call **811** before you dig. For more information about digging safety, visit the safety section of our website at www.kansasgasservice.com.

Paper-Free, Postage-Free, Hassle-Free

Enroll in our Paperless Billing Program and enjoy the convenience of receiving and viewing your monthly statement online with just the click of a mouse. Each month when your billing statement is ready for online viewing, you will receive an email notification with a link to our website where you can review your statement and even pay your bill online.

With paperless billing, there are no more envelopes and no more postage stamps – it's fast, it's easy and it saves trees!

To sign up for our Paperless Billing Program, log on to your account at www.kansasgasservice.com.

Cook Like a Chef from Your Own Home

You don't have to go to culinary school to cook like a chef... just use natural gas. According to a survey of chefs across the United States, 98 percent prefer cooking with natural gas for its even and precise heat. Cooking with a natural gas flame allows for better temperature control and faster cook times, which can help make anyone a pro in the kitchen!

But that's not all. Cooking with natural gas is a more efficient choice. In fact, a natural gas range can cook two meals with the same amount of energy it takes to cook one using an electric range.¹ It can help conserve energy and save you money on your monthly utility bills.

So if you're looking to upgrade your kitchen or improve your cooking skills, just remember: natural gas – the top choice for chefs.

Save energy and money with natural gas – the top choice for chefs across the USA!
