

Natural Gas Matters

IDEAS AND INSIGHTS FROM YOUR NATURAL GAS SERVICE PROVIDER

Help Neighbors Stay Warm With *Share The Warmth*

This holiday season, there's a very special gift you may want to consider adding to your shopping list: a contribution to *Share The Warmth*. With *Share The Warmth*, you can join other Kansas Gas Service customers in helping members of your community stay warm this winter.

Share The Warmth is a partnership between Kansas Gas Service and The Salvation Army that provides energy assistance throughout the winter to senior citizens, individuals with disabilities and those whose immediate financial resources simply cannot cover their home-heating expenses. *Share The Warmth* is available to residents of communities served by Kansas Gas Service.

Your contribution to *Share The Warmth* goes directly into a fund administered by The Salvation Army that makes payments to the utility or fuel supplier on behalf of the person receiving assistance. Donations to the program cover the cost of any home-heating fuel, not just natural gas. It makes no difference – the goal is to keep people warm.

Giving Is Easy: You may contribute online at www.kansasgasservice.com, designate a fixed amount to be added to your monthly bill or round up your bill to the next whole-dollar amount with the additional money going to *Share The Warmth*. You also may contribute by adding an extra amount to your natural gas bill payment and checking the *Share The Warmth* box on your payment coupon.

Please join us as we help keep families warm this winter by adding your gift to *Share The Warmth*.

Stay Safe in Snow and Ice

The accumulation of snow and ice increases the potential for damage to natural gas meters, regulators and other above-ground pipeline facilities. Snow and ice should be cleared from exhaust and combustion air vents of natural gas appliances to keep them operating smoothly and prevent carbon monoxide from entering homes and other structures.

Extreme care should be taken when removing ice or snow from such vents: when possible, use a broom instead of a shovel to avoid damage, and never stand or climb on unsafe ground or surfaces to reach vents.

Always remember, if you smell a pungent or rotten egg-like odor in or around your home, in your neighborhood or at work, it may be a natural gas leak. Leave the area immediately and call 911 or Kansas Gas Service from a telephone away from the area: 1-888-482-4950.

Find Energy Saving Tips for Your Home

Saving energy and saving money go hand in hand, so it just makes sense to keep your house as energy efficient as possible. To find energy-saving ideas for your home, try our online energy calculators.

Our energy calculators were designed to help customers find the most energy-efficient solutions for their homes. They compare thermostat, appliance, home-heating and water-heating options specific to your home and family to help you discover ways to save energy and money.

HERE'S HOW TO USE THEM:

- Visit www.kansasgasservice.com and click on “Energy Calculators” under the “Save Energy & Money” tab.
- Select the calculator you are interested in and follow the prompts.
- Once you have entered the information, the calculator will provide an answer to the question you selected.
