

Natural Gas Matters

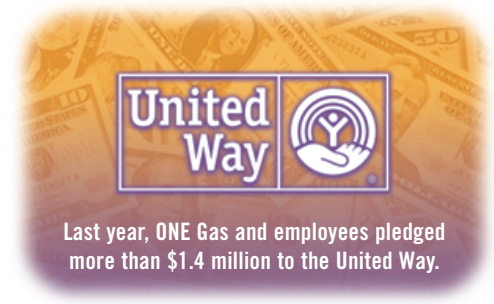

IDEAS AND INSIGHTS FROM YOUR NATURAL GAS SERVICE PROVIDER

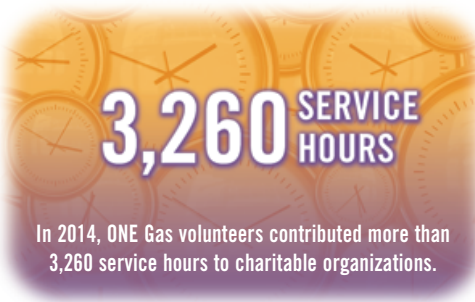

Kansas Gas Service Gives Back to the Community

Kansas Gas Service is proud to be a part of the 360 communities that we serve every day. But delivering safe, reliable natural gas isn't all we do – we believe in giving back to our communities as well. That's why so many of our employees choose to participate in our United Way campaign and employee volunteer projects.

Kansas Gas Service is a division of ONE Gas, Inc., and each year ONE Gas employees in Kansas, Oklahoma and Texas participate in local United Way campaigns to support programs and organizations that improve lives in the communities where we live and work. In 2014, ONE Gas employees, retirees and directors pledged more than \$706,000 to the United Way. With ONE Gas matching every dollar, that's more than \$1.4 million to help maintain the good work of United Way member agencies.

Donating funds isn't the only way our employees help. They regularly volunteer with organizations throughout our service territories like Special Olympics, The Salvation Army, The Humane Society, local food banks and more. In 2014, the hard work of ONE Gas volunteers totaled more than 3,260 service hours, a significant contribution to many charitable organizations.

Our employees know the value of helping those in need, and we're proud to support the many important organizations that help Kansans each day.

Natural Gas: The Cleaner, Greener Fuel

When you use natural gas, you're making a responsible choice for the environment. That's because natural gas is the cleanest-burning fossil fuel, and homes that use natural gas instead of electricity for cooking, clothes drying and space and water heating can reduce their carbon footprint by up to 30 percent.

Natural gas is an efficient choice, too. Ninety-two percent of natural gas is delivered to your home as energy, compared with only 32 percent for electricity. Less energy lost during delivery means less waste, and that's good news for the environment.

But that's not the only good news: natural gas benefits your budget, too. Households that use natural gas appliances for heating, water heating, cooking and clothes drying spend an average of \$653 less per year than homes using electric appliances.

Next time you take a hot shower or light that blue flame on your natural gas range, you can feel good knowing it's fueled by the cleaner, more affordable fuel.
